

Sixth Grade Science Fair

How to begin your science fair project:

1. Go to the Baltimore County Schools homepage: www.bcps.org.
2. Pick STUDENTS from the top bar.
3. Then pick QUICK LINKS research databases.
4. Scroll down to Gr 6-12 and click on: SCIENCE RESOURCE Center.
5. If attempting this at home, insert USERNAME: BCPS and PASSWORD: GALE.
6. Scroll through the topic list on the left until you see: SCIENCE EXPERIMENTS (EDUCATION). Click on it.
7. This will open to 10 pages, with 97 topics of BASIC science fair projects from a reference called EXPERIMENT CENTRAL.

For each topic listed, e.g. PESTICIDES or STORMS, there are two experiments outlined in detail. So this source has $97 \times 2 = 194$ different experiments. Background information on each topic is included, as well as a list of needed supplies, and the estimated time to complete.

You are strongly urged to select your project from these ideas presented in EXPERIMENT CENTRAL.
